Subject: ***Advance Notification***
New Interchange at Florida's Turnpike Mainline with Stirling Road
Project Development and Environment (PD&E) Study
Federal Aid Project Number: TNPK-019-4
Financial Project Number: 417218-1-22-01
Broward County, Florida

Dear Ms. Milligan:

The attached Advance Notification Package is forwarded to your office for processing through appropriate State agencies in accordance with **Executive Order 95-359**. Distribution to local and Federal agencies is being made as noted.

Although more specific comments will be solicited during the permit coordination process, we request that permitting and permit review agencies review the attached information and furnish us with whatever general comments they consider pertinent at this time.

This is a Federal-aid action and the Florida Department of Transportation, in consultation with the Federal Highway Administration, will determine what degree of environmental documentation will be necessary. The determination will be based upon in-house environmental evaluations and comments received through coordination with other agencies. Please provide a consistency review for this project in accordance with the State's Coastal Zone Management Program. In addition, please review this improvement's consistency, to the maximum extent feasible, with the approved Comprehensive Plan of the local government jurisdiction(s) pursuant to **Chapter 163, Florida Statutes**.

We are looking forward to receiving your comments on the project within 60 days. Should additional review time be required, a written request for an extension of time must be submitted to our office within the initial 60 day comment period.

Your comments should be addressed to:

Mr. Raymond A. Ashe, Jr., Manager
Turnpike Environmental Management Office
Florida's Turnpike Enterprise
P.O. Box 613069
Ocoee, FL 34761

Your expeditious handling of this notice will be appreciated.

Sincerely,

Raymond A. Ashe, Jr., Manager
Turnpike Environmental Management Office

New Interchange at Florida's Turnpike Mainline with Stirling Road
Project Development and Environment (PD&E) Study
Financial Project ID No. 417218-1-22-01
Broward County, Florida

---

1. NEED FOR PROJECT

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) study to evaluate a number of alternatives for a new interchange at Florida's Turnpike Mainline with Stirling Road, Milepost (MP) 52, in Broward County, Florida. Preliminary reviews of current and projected traffic conditions indicate a need for a new interchange in this area of Broward County to address existing and future congestion at the Hollywood Boulevard (MP 49) and Griffin Road (MP 53) interchanges.

The interchanges at Hollywood Boulevard and Griffin Road currently serve an Annual Average Daily Traffic (AADT) volume of 36,100 and 21,900 vehicles, respectively. By 2025, these volumes are expected to increase to 52,900 for Hollywood Boulevard and 53,400 for Griffin Road. Forecast models indicate that the addition of an interchange at Stirling Road will reduce the volume at Hollywood Boulevard by 9,600 vehicles per day and by 15,000 vehicles at Griffin Road. If constructed, 37,300 vehicles are forecasted to use the new interchange at Stirling Road by 2025.

The proposed project is consistent with the Broward County Comprehensive Plan (Transportation Element) approved by the Department of Community Affairs (DCA) as required by Chapter 163, F.S. This project is also consistent with the Broward County Metropolitan Planning Organization (MPO) 2030 Long Range Transportation Plan (LRTP) and incorporated into the Gubernatorially-approved Broward County MPO Transportation Improvement Plan (TIP) and Florida Statewide TIP. The project is located in an area that was originally designated by the United States Environmental Protection Agency (USEPA) as a moderate nonattainment area for ozone; however the designation was reclassified as an air quality maintenance area in 1995. It is anticipated that the proposed project will not adversely impact the air quality conformity status of the maintenance area.

---

2. DESCRIPTION OF THE PROJECT

This project proposes to construct a new interchange at Florida's Turnpike Mainline with Stirling Road. A project location map is attached. During the PD&E study, several interchange configurations, utilizing SunPass-only ramps, will be developed and evaluated for potential impacts. Relocation potential and impacts to community services and features will be minimized during the development of alternatives.

Associated projects within the area include the widening of Florida's Turnpike Mainline (Financial Project No. 406095-4) from north of Johnson Street (MP 50.5) to Griffin Road (MP 53). This capacity improvement project will widen the Mainline from six to eight lanes. Construction is scheduled to begin in 2007.

---

3. ENVIRONMENTAL INFORMATION

a. LAND USE

The study area is located within the City of Hollywood, the Town of Davie, the Seminole Tribe of Florida Reservation, and unincorporated Broward County. Three of the four quadrants are located within the Reservation with a mixture of land uses. In the northeast quadrant, there are two churches (Iglesia Bautista and the First Seminole Indian Baptist Church) and the Seminole Hard Rock Hotel and Casino. The southeast quadrant includes the House of Prayer Full Gospel Church (just east of Florida's Turnpike) and residential areas east and south of the church. The headquarters for the Seminole Tribe of Florida is located in the southwest quadrant. There is an approximate 7 ½ acre mobile home community located in the northwest quadrant.

b. WETLANDS

Several excavated surface water bodies occur within the project area. The National Wetlands Inventory (NWI) classifies these as palustrine open water wetlands with permanent hydrology (POWHx). The only Turnpike-owned water body within the Right-of-Way (ROW) is a lateral roadside ditch in the northwest quadrant of the proposed interchange. The Turnpike also owns a large borrow pit (Silver Lake) outside the ROW in the northwest quadrant and is currently leased to the Town of Davie. Immediately north of Silver Lake is the Berman Park Preserve, a palustrine emergent wetland (PEM) owned by the Town of Davie. No impacts to wetlands are proposed.

c. FLOODPLAINS

A review of the Federal Emergency Management Agency Map Number 12011CO304F, Panel 304 of 319 (August 18, 1992) reveals the following:

- the area in the southwest and northwest quadrant of the proposed interchange location is in Flood Zone AH (an area inundated with 100-year flooding for which base flood elevations have been determined; flood depths of 1 to 3 feet);
- the area in the southeast quadrant is in Flood Zone X (areas determined to be outside the 100-year and 500-year flood plain); and
- the area in the northeast quadrant is in Flood Zone AE (an area inundated by 100-year flooding; base flood elevations determined).

d. WILDLIFE AND HABITAT

Preliminary field investigations revealed limited wildlife habitats within the project area and the presence of a single listed species, a white ibis (*Eudocimus albus*, Species of Special Concern, Florida Fish and Wildlife Conservation Commission). A review by the U.S. Fish and Wildlife Service (USFWS) indicated the project occurs within a core foraging area (CFA) of the endangered woodstork, *Mycteria americana*, with an active nesting colony approximately 11.3 miles northwest of the project location. A thorough evaluation of the project vicinity for protected species, and coordination with the appropriate agencies, will be accomplished during the project development process.

e. OUTSTANDING FLORIDA WATERS

There is no Outstanding Florida Water (OFW) (FAC Chapter 62-302) within the project area.

f. AQUATIC PRESERVES

This project is not located within an aquatic preserve (FAC Chapter 62-302).

g. COASTAL ZONE

Coastal Zone Consistency Determination is Required: __ yes X no

h. CULTURAL RESOURCES

Several archaeological and historic sites are located in the vicinity of the project area. A comprehensive Cultural Resources Assessment Survey, with agency coordination, will be conducted during the PD&E study.

i. COASTAL BARRIER RESOURCES

This project is not within the boundaries of any coastal barrier resource areas (PD&E Manual, Part 2, Chapter 26).

j. CONTAMINATION

There are no documented contamination sites within the project area. Neither FDOT District Four nor the Turnpike Enterprise has reported any large fuel spills or illicit discharges. Field observation of illegal dumping and the possibility of illicit discharges are potential concerns. A Contamination Screening Evaluation will be conducted during the study.

k. SOLE SOURCE AQUIFER

This project is located within the Biscayne Aquifer, a Sole Source Aquifer designated by the U.S. Environmental Protection Agency (EPA).

l. NOISE

A privately-owned mobile home community in the northwest quadrant of the proposed interchange and a residential community near the southeast quadrant have the potential for noise impacts. A comprehensive Noise Study Report will be prepared for this project.

m. ESSENTIAL FISH HABITAT

This project is not anticipated to impact any marine or estuarine habitats; therefore, no impacts to Essential Fish Habitats (EFH) are anticipated.

OTHER COMMENTS:

The Seminole Tribe of Florida is a major stakeholder for this study with customs, traditions, and legislation that transcend local, state, and federal regulations. In recognition of this special setting, the study team will be working closely with the Seminole Tribe of Florida to ensure that tribal customs are followed as technical elements and outreach activities for this study are completed. For example, notifications will be made through the Seminole Tribe's internal network in addition to the traditional outlets used to reach the general public while meeting National Environmental Policy Act (NEPA) requirements. For each community-wide meeting, such as

the Alternatives Public Meeting and the Public Hearing, a separate meeting will be held for the Seminole Tribe of Florida. This approach will follow any special cultural traditions while also meeting NEPA requirements.

4. NAVIGABLE WATERWAYS? __ Yes _X_ No

5. PERMITS REQUIRED

Various permit applications may be required to be filed and approved prior to construction. The list of potential permitting and review agencies, and permits required include, but may not be limited to the following:

Section 404 Dredge and Fill
U.S. Army Corp of Engineers
U.S. Environmental Protection Agency (Commenting Agency)
U.S. Fish and Wildlife Service (Commenting Agency)

National Pollutant Discharge Elimination System (NPDES)
Florida Department of Environmental Protection

Environmental Resource Permit
South Florida Water Management District
Florida Fish and Wildlife Conservation Commission (Commenting Agency)
Central Broward Water Control District (Commenting Agency)
Broward County Environmental Protection Department (Commenting Agency)

NOT TO SCALE

New Interchange at Florida's Turnpike Mainline with Stirling Road
Project Development and Environment (PD&E) Study
Project Information Sheet

Project Description and Need

Florida's Turnpike Enterprise has initiated a Project Development and Environment (PD&E) Study to evaluate a number of alternatives for a new interchange at Florida's Turnpike Mainline with Stirling Road (Turnpike Milepost 52) in Broward County, Florida. Preliminary reviews of current and projected traffic conditions indicate a need for a new interchange in this area of Broward County to address existing and future congestion at the Hollywood Boulevard (Turnpike Milepost 49) and Griffin Road (Turnpike Milepost 53) interchanges. Traffic associated with recent developments has increased congestion within the project study area and even further degradation of mobility is anticipated as area-wide development along Stirling Road and SR 7 is planned.

The study will focus on possible improvements in the vicinity of the existing Stirling Road overpass over the Florida Turnpike's Mainline. Several interchange configurations, utilizing Sun-Pass only ramps, will be developed and evaluated for potential impacts. Relocation potential will be minimized during the development of alternatives, however, some right-of-way acquisition is anticipated.

Public Involvement

The Public Involvement strategy for this project will adhere to the requirements of the Florida Department of Transportation's PD&E Manual and the National Environmental Policy Act (NEPA). Public Involvement will commence with the distribution of an Advance Notification package to various federal, state, regional, and local agencies with jurisdictional review or an expressed interest in the project.

With the proposed interchange located within the Seminole Tribe of Florida's property, the study team will work closely with the Seminole Tribe to ensure that all cultural traditions are respected. During the development of alternatives, public input will be solicited through an alternatives workshop and various community meetings. The workshop will be held at two separate locations – one location accessible to the general public and one for the Seminole Tribe of Florida. The same project information will be available at each meeting. In addition, project updates will be distributed to the public through newsletter publications. Once the alternatives have been developed and the analysis complete, two separate Public Hearings, one for the public and one for the Seminole Tribe, will be held and comments incorporated into the public record for FHWA review.

Plan Consistency

The proposed project is consistent with the Broward County Comprehensive Plan (Transportation Element) approved by the Department of Community Affairs (DCA) as required by Chapter 163, F.S. This project is also consistent with the Broward County Metropolitan Planning Organization (MPO) 2030 Long Range Transportation Plan (LRTP) and incorporated into the Broward County MPO Transportation Improvement Plan (TIP) and Florida Statewide TIP.

Process
The study will follow the established Florida Department of Transportation's PD&E Process and will also satisfy the National Environmental Policy Act (NEPA), which is necessary to qualify future project improvement for federal funding eligibility.

Funding
As the anticipated project net revenues will not leverage sufficient bonding capacity to satisfy the project costs, local partnerships with groups that have the means to help finance this improvement are a necessity. Funding for the design phase has been identified in the recently adopted Transportation Equity Act: A Legacy for Users (SAFETEA-LU) federal transportation budget. The Turnpike Enterprise has programmed the PD&E funding in the current fiscal year (2005/2006) and final design funding in FDOT fiscal year 2007/2008.

Schedule
The PD&E Study is anticipated to take approximately 24 months to complete. Future Production efforts will be scheduled to commence following the Location and Design Concept Approval by the Federal Highway Administration (FHWA).
