

Landscaping requirements for above ground utility equipment
(A/C, generators, pool equipment, water purifiers, etc.)

And

Underground storage tanks

*Per Town of Davie Code, all **above ground equipment** must be landscaped to screen the view of the equipment from the street and the adjacent neighbor. The **required landscaping should consist of 36"inch high shrubs in a 3-gallon pot installed every 2'feet**, at least 2' to 3' foot away from equipment. The shrubs should be planted at 1" to 2" inches higher than grade, watered in, then mulched with non-cypress material. The species recommended to use would be native, or drought tolerant hedge material, but not Ficus species, due to high maintenance, such as, Cocoplum, Vibernum, Privet, Stoppers, Dwarf Schefflera 'arboricola' 'trinnette', Silver Buttonwood, Orange Jasmine, Firebush, Podocarpus, and Fakahatchee Grass.

Underground storage tanks are sometimes installed where landscaping already exists, if any tree or palm needs to be relocated or removed, it required to obtain a **Tree Removal/Relocation permit**, call **Landscaping at 954-797-1103 for information.**
