

Preparing Trees for Hurricane Season

April - May

- Learn about proper tree pruning practices from [Florida IFAS Extension](#)
- Only hire contractors properly licensed to perform tree trimming in [Broward County](#)
- Complete necessary tree trimming by June 1
- Follow the [Bulk Waste Instructions](#) for your area. Commercial tree trimmers are required to remove all trimmings from the property.

Storm Warning

- Suspend tree trimming activity
- Anticipate that bulk waste collection service will be suspended
- If bulk waste collection is suspended, do not place trimmings at the curb (call a private hauler)

After the “All Clear”

- Place tree trimmings and landscape debris at the curb
- Separate tree trimmings from roofing material and other debris.
- Be aware that landscape material may be picked up on any day and will not necessarily follow the bulk waste pick up schedule
