PUBLIC NOTICE ON SEWER IMPROVEMENTS PROJECT

When: August 24th, 2020 (Monday) – October 30th, 2020 (Friday)
Night Work Hours (9pm – 6am) (Excluding Weekends & Holidays)

Area Affected:

- starting at corner of University Dr & Nova Drive, continuing East until College Ave
- continuing South along College Ave until University of Florida (UF) IFAS Research & Education Center (3205 College Ave)

For more information, please call: 954-327-3752, after hours 954-327-3750

SANITARY SEWER IMPROVEMENTS

Project Details:

Sanitary sewer collection system improvements in the neighborhood located along Nova Drive, from University Drive to College Ave and to continue south along College Ave, from Nova Dr to University of Florida (UF) IFAS Research & Education Center, located at 3205 College Ave, please see the map.

The work will be performed by LANZO LINING SERVICES, INC. and will include sanitary sewer pipes lining using a trenchless Cured-in-Place Pipe (CIPP) method. This method requires little or zero digging and access to sewer pipes is via existing manholes. The crew will insert a flexible liner inside the old pipe to create a new, watertight, smooth-surfaced, long-lasting pipe within the existing, old pipe. This method will restore our old pipes to a near-new condition without prolonged, expensive and disruptive excavation.

Work will be performed during night hours (from 9pm -6am), occasionally may need to be continued and extended to daytime.

Please expect:

- ***"In-pipe" Noise.*** Customers may hear a *"humming noise"* coming from pipes. To absorb some of the noise, please consider covering in-house drains with a wet-towel or a zip-bag filled with water.
- **Outdoor Noise.** Utilities vacator trucks will be outside in the area operating vacuum and bypass pumps, necessary to clean and maintain sewer services.
- **Odor.** Customers may notice odor that should dissipate quickly. To help reduce odor, please run water in all sinks and drains to make sure p-traps are filled. You can cover floor drains with a wet-towel, or a zip-bag filled with water.
- **Traffic Disruptions.** Construction crews do most of the sewer lining work through manholes in the streets. Spot repairs may require excavation prior to lining process.

If you have any additional questions regarding this project please contact us directly at 954-327-3742 or visit our website: www.davie-fl.gov/925/Wastewater-Collections

Thank you in advance for your cooperation and understanding!
